4. A **special group** bicycle tools **discount opportunity**
5. A Completion of Course **Park Tool School certificate**.

Bigger and better!
Big Blue Book of Bike Repair
- Second Edition sugg. retail \$29.99

Book review:

"Prior to reading this book I knew absolutely nothing about the maintenance & repair of bicycles but as I just purchased a decent MTB I needed some sort of guide. Within an hour reading this book I discovered that my chain was too long, the rear derailleur housing cable was too short, my linear pull breaks were out of kilter and my front derailleur required some lateral adjustment - and this is a brand new bike!!"

"I found the book to read more like a novel than a technical manual and could not put it down. It is extremely well written, the examples are beautifully photographed and I would highly recommend this book to anybody who owns a bike in fact I would go as far as to say you can not do without this book. Even a complete novice like me now feels confident enough to carry out the above adjustments myself and lets face it some people might not want to trust their brand new pride of joy to some local bike shop that charges like a wounded bull."

"As I get to feel more comfortable with doing my own maintenance and repairs this book will pay for itself over and over. Calvin Jones would have to be the authority on bicycle mechanics."

"Highly recommended!"

Limited to 10 students!

Hands on instruction topics include:

- flat tire repair
- different sorts of lubricants
- dérailleur & brake adjustments
- bearing adjustments
- wheel truing
- routine bicycle maintenance & much more!
